Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 14-29 are rejected under 35 U.S.C. 102(e) as being anticipated by Spitler et al. (US Publication 2005/0085813). Spitler et al. disclose a method for implanting a spinal fixation element into at least one spinal anchor disposed within a vertebra in a patient's spinal column comprising the steps of introducing a spinal fixation element (90) having a feature that is considered bulbous (91) through a lumen (see fig. 2E) that is coupled to a spinal anchor (61), and wherein the access device has a slot in the sidewall configured to prevent the feature from passing through of the fixation element (see fig 8A). Spitler et al. also disclose the step of manipulating the spinal fixation element and causing the feature to sit within the receiving member (54) and to have the remaining portion of the fixation element extend through the slot (see at least paragraph 0053). The fixation element is also locked (par 0053), and Spitler et al. also disclose a pusher member (see fig. 12A, 1201), that aids in advancing the spinal anchor (90) distally (turn to 12B). Spitler et al. also disclose at least two spinal anchors with an access device (see paragraph 0011).

Response to Arguments

Applicant's arguments with respect to claims 14-29 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
